PROFILE

Full-stack developer experienced in building and deploying production applications with React, Next.js, ASP.NET Core, REST APIs, PostgreSQL, MySQL, Docker, and JWT authentication. Delivered end-to-end solutions for field-service platforms, inventory systems, and client websites from database design through frontend, deployment, and handover.

EDUCATION

Higher Diploma in Computing & Software Engineering

ICBT Campus, Colombo | 2025 – Present

G.C.E. Advanced Level, Sri Lanka

Bio Science · 1C, 2S · 2023

PROJECTS

DispatchArc — Full-Stack Project | 2026

[GitHub](#) · [Live Demo](#)

- Built a field-service platform managing the full job lifecycle (scheduling, technician assignment, quoting, invoicing, payments) with role-based access across 3 permission tiers.
- Designed the PostgreSQL schema and REST API around job-state transitions; secured every endpoint with JWT authentication.
- Containerized the application with Docker for consistent one-command setup across development and deployment environments.

Stack: C# · ASP.NET Core · PostgreSQL · REST API · JWT · Docker

BGS AgriStock — Full-Stack Project | 2026

[GitHub](#) · [Live Demo](#)

- Replaced a fully manual paper-based stock system with a centralized inventory platform for a live fertilizer and agrochemical business.
- Designed the MySQL data model and built inventory, stock-movement, and reporting workflows used daily by warehouse staff.
- Delivered a simple interface that required no training and reduced day-to-day stock discrepancies.

Stack: React · JavaScript · MySQL

Suranga Gems — Client Website | 2026

[GitHub](#) · [Live Website](#)

- Independently delivered a responsive production website for a gem retailer from client brief through development, deployment on their domain, and handover.
- Optimized an image-heavy product catalog for mobile, improving load responsiveness across the full catalog.

Stack: React · JavaScript · CSS

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Java, HTML5, CSS3

Frontend: React, Next.js, Vite

Backend: ASP.NET Core, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL

Authentication: JWT, Role-Based Access Control

DevOps & Tools: Docker, Git, GitHub
